PROFESSIONAL SUMMARY

Results-driven IT graduate with a strong foundation in full-stack web development (PHP, JavaScript, Node.js, MySQL) and hands-on experience in system development, IoT prototyping, and cybersecurity fundamentals. Demonstrated ability to build data-driven applications, reduce manual processes by 50%, and support legislative operations through technical documentation and coordination. Eager to contribute as a Junior Developer or IT Support Specialist in a forward-thinking organization.

PROFESSIONAL EXPERIENCE

Customer Service Representative | Alorica (Amazon Account), San Nicolas, Ilocos Norte *June 2026 – Present*

- Handled 50+ inbound customer inquiries daily via phone, chat, and email, resolving issues related to orders, payments, returns, and account management with a 95%+ customer satisfaction rating.
- Utilized Amazon's internal CRM and ticketing systems to document interactions, track order status, and escalate complex technical issues to specialized support teams.
- Troubleshoot common technical problems (e.g., login failures, payment gateway errors, app glitches) by following diagnostic scripts and providing step-by-step guidance to customers.
- Consistently met or exceeded key performance metrics, including average handle time, first-contact resolution, and quality assurance scores, earning recognition from team leads.
- Collaborated with cross-functional teams to identify recurring customer pain points, contributing to the refinement of knowledge base articles and FAQ documentation.

Legislative Intern | Provincial Government of Ilocos Sur *January 2026 – May 2026*

- **Technical Documentation** – Drafted and refined an inventory management system outline (features, data fields, reporting formats) based on iterative supervisor feedback, demonstrating requirements gathering and functional specification skills.
- **Digital Record Management** – Maintained a comprehensive Excel logbook for 100+ official documents (ordinances, resolutions, committee reports), tracking distribution and counter-signatures across multiple offices; implemented a checklist system that significantly reduced missing items.
- **Office Operations** – Operated and troubleshooted high-volume office equipment, including processing 5,890+ duplex pages, resolving paper jams, and ensuring document integrity.
- **Inter-Office Coordination** – Served as a reliable liaison for cross-office transactions (CSC, Sports Office, Secretariat), honing professional communication and coordination under tight deadlines.
- **IT Systems Support** – Supported technical discussions on a proposed flood monitoring system by documenting features and taking detailed meeting notes, displaying curiosity in IT solutions for public service.

EDUCATION

University of Northern Philippines (UNP), City of Vigan, Ilocos Sur *2022 – 2026*

Bachelor of Information Technology

- Academic Excellence Award (Bronze) – Top 10% of the cohort
- Outstanding Leadership Award (Bronze) – Recognized for initiative and team coordination
- Excellence in Journalism (Silver) – Technical writing and content development

KEY PROJECTS

Client Satisfaction Measurement & Recommendation System *PHP, jQuery, MySQL, Bootstrap 5, SCSS, XAMPP*

- Developed a web-based feedback system that aggregates satisfaction scores and generates automated recommendations using data consolidation algorithms.
- Reduced manual reporting time by 50% through efficient backend logic and real-time data processing.
- Designed a responsive, accessible UI with Bootstrap 5 and SCSS; implemented dynamic form validation and real-time charts using jQuery.

IoT Mobile-Controlled Smart Curtain System

C#, ESP32, Bluetooth Terminal

- Programmed an ESP32 microcontroller to receive Bluetooth commands and control a servo motor for automated curtain operation.
- Built a C# desktop companion application for serial command transmission via Bluetooth.
- Achieved reliable wireless control up to 10 meters, reducing manual effort in daily curtain adjustments.

Network Penetration Testing with Kali Linux

Kali Linux, Nmap, Network Scanning

- Conducted reconnaissance on a lab network to identify open ports, running services, and OS fingerprints.
- Utilized Nmap Scripting Engine (NSE) for vulnerability detection and documented findings with mitigation strategies.
- Presented results during a cybersecurity seminar, demonstrating practical security assessment skills.

TECHNICAL SKILLS

- Programming Languages: C#, PHP, Java, VB.NET, JavaScript, Python
- Front-End Development: HTML5, CSS3, Bootstrap 5, SCSS, jQuery
- Back-End & Databases: Node.js, MySQL, XAMPP, HeidiSQL
- Tools & Platforms: Git, Microsoft Office Suite, Canva
- Cybersecurity: Kali Linux, Nmap (network scanning, NSE)
- IoT & Embedded Systems: ESP32, Bluetooth Terminal, basic prototyping
- AI-Assisted Development: DeepSeek-TUI, Claude Code

SOFT SKILLS

- Problem-Solving – Analytical thinker with a solution-oriented mindset
- Communication – Clear verbal and written communication across technical and non-technical stakeholders
- Collaboration – Effective team player with experience in cross-functional coordination
- Adaptability – Quick learner, comfortable with emerging technologies and dynamic environments

TRAININGS & SEMINARS

- DYCI Robotics Seminar Bocaue – Bulacan (April 2025)
- HYTEK Power Inc. Seminar – Quezon City (April 2025)
- Internet of Things (IoT) Seminar – Quezon City (April 2025)
- Cybersecurity Seminar – University of Makati (April 2025)
- Design Made Easy: Beginner's Guide to Canva – Online (May 2025)

LANGUAGES

- **Filipino** – Native
- **Ilocano** – Native
- **English** – Working Proficiency (written and spoken)
