CAREER OBJECTIVES

Motivated Information Technology student (**graduating 2026**) seeking an entry-level position as a **Junior Developer** or **IT Support Specialist**. Eager to apply strong foundation in **web development** (PHP, JavaScript, Node.js) and database management (MySQL) to contribute to innovative projects and support organizational efficiency.

EDUCATIONAL BACKGROUND

Bachelor of Information Technology (Expected: May 2026)

University of Northern Philippines (UNP), City of Vigan, Ilocos Sur

2022 – Present

- **Academic Excellence Award (Bronze)**
- **Outstanding Leadership Award (Bronze)**
- **Excellence In Journalism (Silver)**

Junior High School – Senior High School

Divine Word College of Vigan (DWCV), City of Vigan, Ilocos Sur

2016 – 2022

- **With Honors (S.Y. 2021 – 2022)**

Elementary

Sagsagat Elementary School, San Ildefonso, Ilocos Sur

2010 – 2016

SKILLS

TECHNICAL SKILLS:

- **Programming:** C#, PHP, Java, VB.NET, JavaScript, Python
- **Web:** HTML5, CSS, Bootstrap5, SCSS, Node.js, jQuery
- **Databases:** MySQL, XAMPP, HeidiSQL
- **Tools:** Git, Microsoft Office Suite, Canva, Kali Linux, Nmap
- **IoT:** ESP32, Bluetooth Terminal, basic prototyping
- **Cybersecurity fundamentals:** network scanning (Nmap)
- **AI-assisted development** (DeepSeek, Claude)

SOFT SKILLS:

- Problem-solving & analytical thinking
- Communication & teamwork
- Adaptability & willingness to learn

LANGUAGES:

- *Filipino (Native)*
- *Ilocano (Native)*
- *English (Working Proficiency)*

PROJECTS

1. Client Satisfaction Measurement with Analytical Recommendation System (PHP, jQuery, MySQL, Bootstrap5, SCSS, XAMPP, JavaScript)

- Built a web-based system that collects client feedback and generates automated recommendations using aggregated satisfaction scores.
- Implemented data consolidation algorithms to reduce manual reporting time by 50%.
- Designed responsive UI with Bootstrap5 and SCSS; used jQuery for dynamic form validation and real-time charts.

2. Penetration Testing using Nmap with Kali Linux (Kali Linux, Nmap, Network scanning)

- Performed network reconnaissance on a lab environment to identify open ports, services, and OS fingerprints.
- Documented vulnerabilities and presented mitigation strategies as part of cybersecurity seminar training.
- Demonstrated use of Nmap scripting engine (NSE) for basic vulnerability detection.

3. IoT Mobile-Controlled Smart Curtain System (C#, ESP32, Bluetooth Terminal)

- Programmed an ESP32 microcontroller to receive Bluetooth commands from a mobile terminal, controlling a servo motor to open/close curtains.
- Built a C# desktop companion app to send serial commands via Bluetooth (optional).
- Achieved reliable wireless control up to 10 meters; reduced manual effort for daily curtain operation.

TRAININGS AND SEMINARS ATTENDED

- **DYCI Robotics Seminar** (Bocaue, Bulacan) – April 2025
- **HYTEK Power Inc. Seminar** (Quezon City) – April 2025
- **Internet of Things Seminar** (Quezon City) – April 2025
- **Cybersecurity Seminar** (University of Makati) – April 2025
- **Design Made Easy: Beginner's Guide to Canva** (Online) – May 2025

WORK EXPERIENCE

Legislative Intern | Provincial Government of Ilocos Sur

January 2026 – May 2026

- Drafted and iteratively refined an inventory management system outline (features, data entry fields, reporting format) based on supervisor feedback, demonstrating requirements gathering and documentation skills.
- Maintained a digital Excel logbook for 100+ official documents (ordinances, resolutions, committee reports), tracked distribution and counter-signatures across multiple offices, and created a checklist that reduced missing items.
- Operated and troubleshooted high-volume office equipment (duplex printing 5,890+ pages, scanning, photocopying), resolving paper jams and ensuring document integrity.
- Served as a reliable liaison for cross-office transactions (CSC, Sports Office, Secretariat), honing professional communication and coordination skills under tight deadlines.
- Supported technical discussions on a proposed flood monitoring system by taking notes and reviewing features, displaying curiosity in IT solutions for public service.
